

Train Evacuation Station

For mounting inside train carriages

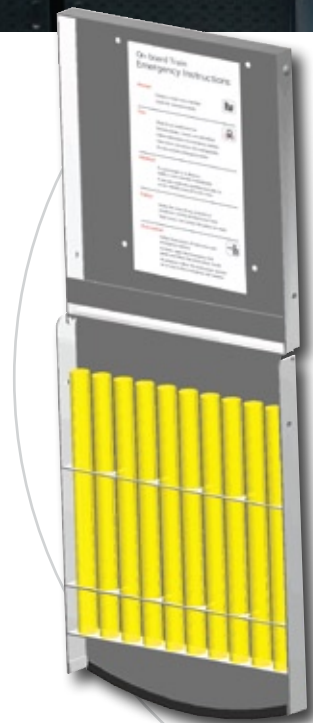

EvacLight™

Train Evacuation Light Station

Three aspects of risk reduction in a single product

1. Provides automatic illumination of ten evacuation lights
2. Provides each passenger with a personal evacuation light
3. Provide rescue crews with highly visible evacuee locators

Features of SnapLights™

- Light batons are activated automatically by pull down of box cover
- Activation instantly illuminates train carriage and exit doors
- Light batons are drop proof and weather proof
- Batons provide 360 degrees of area light
- Light batons provide high output light for two hours
- Evac stations keep light batons secure until use
- Blast and fire resistant steel cabinet
- Station provides visual alert of tampering
- *Maintenance free: light batons stay ready for years*

...then work every time
